**CAUTION:** N<sub>2</sub> inlet pressure greater than 110 psig (7.6 bar) may cause valve not to close when actuation control pressure vented.

**CAUTION:** Product selection is the sole responsibility of the user, regardless of any recommendations or suggestions made by the factory. The user shall make selections based upon their own analysis and testing with regard to function, material compatibility and product ratings. Proper installation, operation and maintenance are also required to assure safe, trouble free performance.
