## Overview

NANOCHEM® MegaShield™ Purifiers ensure gas consistency for bulk gas purification. Select MS-Series purifiers for flow rates up to 1000-1500 slpm (60-90 Nm³/hr). A variety of sizes are available to meet capacity and lifetime requirements. Fourteen (14) different purification media are available to purify 33 gases.

## MegaShield™ (MS-Series)

MS-Series purifiers enable higher flow rates and lower pressure drops than the corresponding P-Series Models. MS-Series purifiers are available in 8, 16, and 32 liter sizes. The purifier comes completely assembled, and consists of an inlet and outlet springless diaphragm valve; 2-4 canisters with suitable purification media, and a 100 µm SS frit on the inlet and outlet.

MS-Series purifiers are completely retrofittable in P-Series installations. Media refills are available through MATHESON for all sizes.
